Remind Hub

A single, powerful platform for engagement and learning

Communication requires engagement. The ability to send out information to your community is crucial, but so is getting through—something that's much more challenging to ensure.

When school communication systems are designed for coverage, not connection, engagement suffers. Families are required to download apps, set up notifications, and keep track of multiple accounts, making it harder to access and interact with important information.

For over a decade, Remind has set the standard for effective, student-focused communication. With Remind Hub, communication means more than sending out information: it means creating a shared foundation of engagement that allows everyone to support student learning.

Breadth

360-degree communication

Remind Hub is designed for all the communication that happens within a district, from the central office to the classroom to the practice field.

Equipped for both two-way and mass communication, Remind works for everyone in your community. With urgent alerts, automated notifications, enterprise integrations, and more, Remind makes it easy to address all of your communication needs.

Depth

Equitable engagement for everyone

Remind Hub allows educators to meet each and every person where they are, on the devices they have, and in their preferred languages.

Students and families can receive and send information on Remind through app, email, web, and SMS text messaging—no smartphones or internet necessary. Plus, **automatic translation in 100+ languages** helps multilingual families stay engaged with student learning.

Usage

The most engaged platform in education

Actively used in 80% of US schools and organically adopted by millions of teachers, Remind is used and loved because it works.

With Remind Hub, schools and districts can channel existing usage into engagement for mass communications, targeted interventions, strategic initiatives, and more—all while **protecting their communities with administrator oversight and best-in-class privacy policies.**

Address all of your communication needs

Choose the Remind Hub plan that's right for your community **www.remind.com/hub-plans**

Remind Hub

Powerful administrator tools

Administrator oversight
Protect your community with archived communication, user oversight, and default settings and controls

Analytics and reporting
Generate usage and engagement reports for informed decision-making

SIS integration
Enable SSO with Clever, ClassLink, and Google

Privacy and security
Keep information safe with iKeepSafe certification for FERPA, COPPA, TCPA, and more, plus ISO 27001:2013 certification

Searchable people list
Find and communicate with any teacher, student, parent, or staff member in your school or district

Mobile app and web portal
Use Remind from Android, iOS, or your web browser

Mass communication for any situation

Urgent messages
Send emergency alerts via SMS, app, phone, and email to make sure important notifications can't be missed

Auto messaging
Automate customized messages for attendance notifications, overdue library books, health checks, and more

Message by grade level
Target different grade levels with personalized messaging

Custom group creation and outreach
Create groups to tailor messaging for PTO, transportation, clubs, sports teams, and more

Social media cross-posting
Broadcast announcements on Facebook, Twitter, and Instagram to broaden outreach

Surveys
Build and send custom surveys to your community for health checks, permission slips, exit tickets, and more

Best-in-class two-way communication

Built for schools and districts
Communicate confidently with protected contact information

Rich messaging
Make communication memorable with video, pictures, files, and voice clips

Newsletters and posts
Build rich content by integrating with Smore and other third-party apps that educators are already using

Voice calls
Combine the expediency of a phone call with the protection of a private line

Video integrations
Connect virtual meeting solutions including Google Meet, Microsoft Teams, and Zoom

Equitable and inclusive engagement

Works on any device
Your community can use Remind via SMS, mobile app, email, or web browser

SMS messaging
Everyone can use Remind as long as they have a phone —no app download required

Two-way translation in 100+ languages
Messages are automatically translated into the preferred language of the recipient, including two-way messaging via SMS

Enhanced translation options
Edit capability and optional human translation are available for school and district teams

Custom messaging lists
Personalize communication for specific groups or topics
