# Remind

Deepen community engagement with surveys

There are many reasons why schools and districts need to collect information from students and families, from health screenings to school climate to classroom exit tickets. But surveys are only effective if they're completed. The more information the respondent is required to enter, the more likely they are to lose interest.

Surveys on Remind come pre-filled with data, so it's quick and easy for recipients to respond. The result? More feedback from your community.

These no-login surveys can be sent like any other announcement via text, app, and email. After they're done, an easy-to-use dashboard and CSV downloads make it simple to access reports and insights so you can analyze responses alongside recipient data.

Use surveys for:

✶ Health screenings

Ask your community about their daily health status and track responses in real time to make decisions for your campus.

✶ Social-emotional check-ins

Check in with students and families about how they feel after major events or before important academic milestones to set them up for success.

✶ Exit tickets

No more grading individual pieces of paper. Now, teachers can use Remind to send exit tickets directly to students at the end of class.

Surveys are available through Remind Hub.
